PROFILE

I design, build and ship complete products. In 2026 I led AnyTool, NearBlend and WorkDail from first commit to launch: web apps, iOS and Android apps, backends and design. I work AI-native with Claude and pick up new stacks fast; Next.js, Flutter and React Native all run in production.

SKILLS AT A GLANCE

FRONTEND
React · Next.js · TypeScript · JavaScript · Tailwind CSS · HTML & CSS · PWA · i18n

AI
Claude Code · Multi-agent workflows · Claude API · MCP · Transformers.js · MediaPipe · ElevenLabs

MOBILE
Flutter · Dart · React Native · Expo · iOS · Android

IN THE BROWSER
WebAssembly · Web Workers · FFmpeg.wasm · PDF.js · Tesseract.js · Three.js

BACKEND & DATA
Node.js · Supabase · PostgreSQL · PostGIS · Edge Functions · Firebase · REST APIs · SQLite

DESIGN
UI/UX · Design systems · Claude Design · Brand identity · Pitch decks · Motion video

CLOUD & DEVOPS
Vercel · Cloudflare Workers, Pages & R2 · Codemagic CI/CD · GitHub · Turborepo · pnpm

MAPS & PAYMENTS
Mapbox · Google Maps · Razorpay (UPI)

SECURITY
Security audits · Row-level security · 2FA · Web Crypto API

GROWTH & PUBLISHING
Technical SEO · AEO/GEO · Google Play Console · App Store Connect · TestFlight

EXPERIENCE

AnyTool — Founder & CEO — Web

Jan 2026 – Present

anytool.tech · 1,312 free tools for PDF, image, video, audio and more, running entirely in the browser

- Architected a 100% client-side Next.js platform with 1,462 static routes. Processing and AI run on the device (WebAssembly, Web Workers, Transformers.js, MediaPipe), so users' files never leave the browser.
- Built offline mode with a service worker: once loaded, most tools reopen and work with Wi-Fi off, even after a browser restart (10 of 10 passed in production tests).
- Led a security audit of the 37 security tools: 102 findings, all 15 high-severity issues fixed and 60 fixes in total, each proven by automated old-vs-new browser checks.
- Grew discovery with technical SEO and AI-answer optimisation (structured data, IndexNow): AnyTool pages were cited 23,000+ times in AI answers from Microsoft Copilot and partners in 3 months.
- Protected the code without tracking users: a proprietary licence, build-time provenance markers, a domain lock and blockchain-timestamped evidence.

EXPERIENCE, CONTINUED

NearBlend — Co-Founder & CEO — Web · iOS · Android

May 2026 – Present

nearblend.com · Find people, activities and places near you, and meet people who share your interests

- Live on Google Play (Sept 2026), the App Store (Oct 2026) and the web as a PWA; built with Flutter, Supabase and Mapbox, and I ran both store releases end to end.
- Built realtime chat and group chats, push notifications on iOS, Android and the web, and a Discover ranking by Bayesian-adjusted rating, distance and reviews.
- Privacy and safety by design: Ghost Mode, no background location tracking, data stored in India, family-safe content and under-18s hidden by default.

WorkDail — Founder & CEO — Web · iOS · Android

Jul 2026 – Present

workdail.com · Find skilled workers nearby and call them directly; Hindi-first, made for India

- Live on the web, Google Play and the App Store in India: Next.js web and admin on Cloudflare Workers, React Native (Expo) apps and a Supabase backend.
- Distance-first search on PostGIS across 134 kinds of work in 15 languages, secured with row-level security and 99 versioned SQL migrations.
- Hardened the admin panel with 2FA (30-minute idle window, 12-hour cap, 5-strike lockout); Razorpay UPI integration; CI/CD on Codemagic.

HOW I BUILD WITH AI

01 Claude Code, every day
I plan, build, review and test with Claude Code, and I approve every commit myself.

02 Multi-agent workflows
Security audit: 102 findings across 37 tools. Research: 13 agents, 148 fact-checks, 17 minutes.

03 Verified before release
Automated Chrome checks compare old and new builds, then re-check production.

04 Claude Design
App, web and print design on canvases of 100+ boards, from brand directions to design systems.

05 AI inside products
On-device models in the browser (Transformers.js, MediaPipe, OCR) and Claude API features.

06 AI voice and video
Explainers and reels with AI voice-over, rendered in code with headless Chrome and FFmpeg.

DESIGN WORK

APP DESIGN · BRANDING
Zer0 · private messenger
53 phone and 19 desktop screens in light and dark, a full component kit and 5 brand directions.

UI/UX · DESIGN SYSTEM
Dabba · restaurant ordering
136 boards in light and dark, with Arabic RTL, and a design system of 28 components and 64 icons.

WEB DESIGN · BRANDING
Lumen Greens · real estate
Brand mark, UI kit and responsive home pages for a luxury housing project; a 19-slide case study.

Brand and marketing: investor decks, one-pagers and explainer videos with AI voice-over for my products, a LinkedIn brand kit, app store creatives, and a scroll-animated pitch website for a chai franchise brand.

EDUCATION

Computer Engineering
Jamia Millia Islamia, New Delhi
